

INCOME DEDUCTION ORDER PAYMENT COMPUTATION CHART

Write in the amount in the section that states how the payments of support were ordered to be paid, and compute the other three as indicated. You must fill in every section of the chart on the Income Deduction Order. Compute the processing fee by multiplying the amount of pay by 4% or .04. If that amount is more than \$5.25, indicate only \$5.25 in the processing fee column.

Support Payments ordered to be paid

Every week \$ _____ times 52 weeks divided by 26 = _____ every other week
times 52 weeks divided by 24 = _____ twice per month
