Dear Mr. Pemberton:

Environmental Health conducted an inspection of the Onsite Sewage Treatment and Disposal System (OSTDS) at the above referenced location on June 2, 2011. The condition(s) stated below outline the department's assessment of the OSTDS:

Status of Property:

The premise was vacant at the time of our inspection and no overflows were observed. Because there were no occupants living in the residence, no sewage flow was being generated; therefore, our ability to fully assess the functionality of the system was limited.

Septic Tank Compartment:

The condition of the internal structure of the tank compartment could not be determined because the tank was not opened for a visual inspection. However, a limited external inspection of the tank was conducted.

- No structural deficiencies were noted.

Drainfield System:

The drainfield system was probed and the soil adjacent to the drainfield was augured to assess the system's functionality.

- A moderate amount of roots were noted in the tank and drainfield areas. Roots could alter system functionality; however, no structural deficiencies were apparent during the inspection.
- A sewage flow has not been generated for some time; therefore, the functionality of the system could not be determined.

Conclusion:

- No action is required at this time. This letter does not imply that the system will perform optimally for a specific period of time.
