Dear Mr. Gleaton:

Environmental Health conducted an inspection of the Onsite Sewage Treatment and Disposal System (OSTDS) at the above referenced location on December 22, 2006. The condition(s) stated below outline the department's assessment of the OSTDS:

Status of Property:

The premise was vacant at the time of our inspection and no overflows were observed. Because there were no occupants living in the residence, no sewage flow was being generated; therefore, our ability to fully assess the functionality of the system was limited.

Septic Tank Compartment:

The condition of the internal structure of the tank compartment could not be determined because the tank was not opened for a visual inspection. However, a limited external inspection of the tank was conducted.

- Our inspection revealed that the OSTDS tank compartment appeared to be constructed of brick and appeared to be deteriorated. See below for action required.

Drainfield System:

The drainfield system was probed and the soil adjacent to the drainfield was augured to assess the system's functionality.

- The drainfield was found to be constructed of cradle drain and gravel material, which indicates that the system may be at least 25 years old.
- A moderate amount of roots were noted in the tank and drainfield areas. Roots could alter system functionality; however, no structural deficiencies were apparent during the inspection.

Action Required:

- **Pump and Certify Septic Tank**

Based on our findings from the external inspection, we believe that a system replacement may be needed. However, Florida Administrative Code 64E-6 mandates that only a licensed septic tank contractor can certify whether a septic tank is structurally sound. The certification is at the property owner's expense. Should a licensed septic tank contractor determine that the septic tank is structurally sound following a thorough internal inspection, a replacement may not be necessary.

When the tank inspection report is received by our department (please fax to 595-6777), we will review the report and make a determination on the status of the tank compartment at that time. Also, a determination will be made regarding utilization of the existing drainfield if the existing tank compartment must be replaced. If it is determined that the tank must be replaced, a repair/replacement permit must be purchased from this office to install a new system.

This inspection will be honored for a period of nine months. If we can be of further assistance, please do not hesitate to call us at (850) 595-6786.
