Dear Mr. Jones:

Environmental Health conducted an inspection of the Onsite Sewage Treatment and Disposal System (OSTDS) at the above referenced location. The condition(s) stated below outline the department's assessment of the OSTDS:

The premise has been occupied for a considerable time and no overflows were observed at the time of the inspection. However, the condition of the internal structure of the tank compartment could not be determined because the tank was not opened for a visual inspection.

The drainfield system was probed and the soil adjacent to the drainfield was augured to assess the system's functionality. Moderate root intrusion was found in the tank and drainfield areas that could alter the system's functionality in the future. Also, it was determined that the drainfield does not have the proper separation from the seasonal high water table based on Florida Administrative Code 64E-6. In the event a repair to the OSTDS is warranted in the future, the drainfield may need to be modified to meet the code requirements. These items are for information only. The system appeared to be operating properly at the time of our inspection.

This letter will be honored for a period of six months. If we can be of further assistance, please do not hesitate to call us at (850) 595-6786.

Sincerely,
