Dear Property Owners:

Environmental Health conducted an inspection of the Onsite Sewage Treatment and Disposal System (OSTDS) at the above referenced location on April 8, 2009. The condition(s) stated below outline the department's assessment of the OSTDS:

**Status of Property:**

The premise was vacant at the time of our inspection and no overflows were observed. Because there were no occupants living in the residence, no sewage flow was being generated; therefore, our ability to fully assess the functionality of the system was limited.

**Septic Tank Compartment:**

The condition of the internal structure of the tank compartment could not be determined because the tank was not opened for a visual inspection. However, a limited external inspection of the tank was conducted.

- No structural deficiencies were noted.

**Drainfield System:**

The drainfield system was probed and the soil adjacent to the drainfield was augured to assess the system's functionality.

- It was determined that the drainfield does not have the proper separation from the seasonal high water table based on Florida Administrative Code 64E-6. In the event a repair to the OSTDS is warranted in the future, the drainfield may need to be modified to meet the code requirements.
- A moderate amount of roots were noted in the tank and drainfield areas. Roots could alter system functionality.
- Drainfield performance is heavily dependent upon soil conditions and water usage. While there is no set time frame for failure of drainfield systems, those in poor soil conditions, such as those found at the above referenced property, can be affected by saturation due to periods of heavy rainfall and heavy water usage. This item is for information only.
- A sewage flow has not been generated for some time; therefore, the functionality of the system could not be determined. No structural deficiencies were apparent at the time of our inspection.

**Note:**

An unapproved greywater discharge pipe was located at the rear of the house. This discharge is considered "greywater-defined as, domestic sewage from residential laundry waste", and is a violation of FAC 64E-6 and FS 381.0065, and must be corrected. See below for action required.

**Action Required:**

**Greywater discharge (laundry water) connection to septic tank**  
The greywater discharge must be properly connected to the OSTDS through a wastewater line installed in accordance with the Escambia County Plumbing Ordinance. This will put an additional but necessary load on the septic system, which may be adversely affected. However, the only alternative would be to install a separate laundry waste system. A new laundry waste system would require OSTDS permitting by Environmental Health. Plumbing permits must be purchased through the Department of Building Inspections when connecting the greywater discharge to the septic tank. For information please call (850) 595-3550. We will not require that this issue be corrected prior to closing; however, it must be corrected within 30 days and a re-inspection will be conducted to assure compliance.

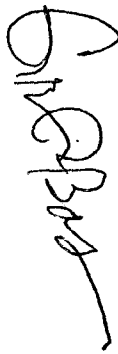

This inspection will be honored for a period of nine months. If we can be of further assistance, please do not hesitate to call us at (850) 595-6786.

Sincerely,

Phillip L. Davies
