Dear Mr. & Mrs. Martineau:

Environmental Health conducted an inspection of the Onsite Sewage Treatment and Disposal System (OSTDS) at the above referenced location. The condition(s) stated below outline the department's assessment of the OSTDS:

Status of Property:

The premise was vacant at the time of our inspection and no overflows were observed. No sanitary nuisances or violations were noted. Because there were no occupants living in the residence, no sewage flow was being generated; therefore, our ability to fully assess the functionality of the system was limited.

Septic Tank Compartment:

The condition of the internal structure of the tank compartment could not be determined because the tank was not opened for a visual inspection. However, a limited external inspection of the tank was conducted.

- No structural deficiencies were noted.

Drainfield System:

The drainfield system was probed and the soil adjacent to the drainfield was augured to assess the system's functionality.

- The inspection revealed that a portion of the drainfield area is located on the adjacent property. Florida Administrative Code 64E-6 requires a minimum setback of 5 feet to property lines. In the event that the system requires a repair in the future, a new drainfield area must be installed that is located with the proper setback to the property line.
- The drainfield was found to be constructed of cradle drain and gravel material, which indicates that the system may be at least 25 years old.
- No structural deficiencies were noted.

This letter will be honored for a period of nine months. If we can be of further assistance, please do not hesitate to call us at (850) 595-6786.

Sincerely,
